

COVENTRY™

Poly Double-Onyx

ESD WIPES

Fully static dissipative wipe for sensitive electronics and to prevent tribo-charging surfaces.

6259ESD2 9" x 9" (22.9 cm x 22.9 cm) wipes
150 wipes per bag

- Class 100 – 1000 (ISO 5-6) black, laser-sealed edge polyester wipe
- Static dissipative within 10^7 - 10^9 range for S20.20 compliance
- Conductive material is double-sided and double-density for maximum continuity to ground
- High durability for cleaning rough, abrasive, or irregular surfaces

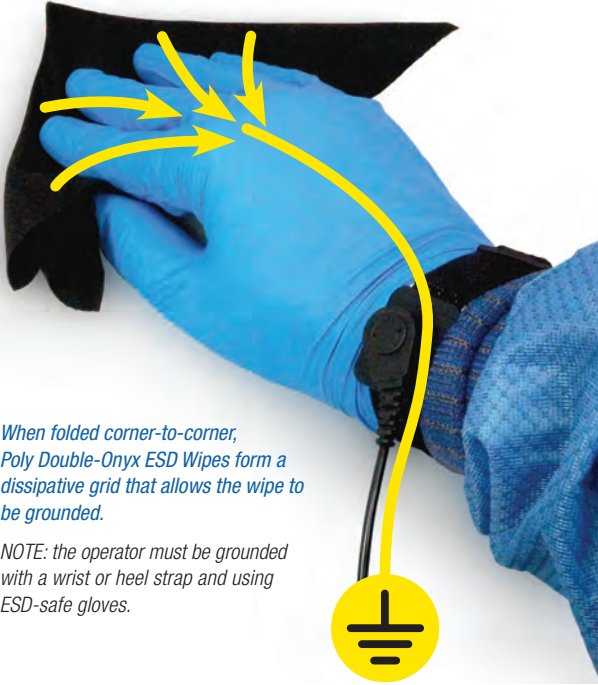

Poly Double-Onyx ESD Wipes

Poly Double-Onyx™ ESD Wipes are made from 2nd generation black no-run monofilament polyester knit, providing excellent strength, absorbency and chemical compatibility. These wipers are perfect for general cleanroom and equipment maintenance, or any critical applications where lint is not tolerated. The black color makes them uniquely valuable as inspection wipes for light colored soils and dust. The conductive carbon filaments are knitted into both sides of the wipes and twice as densely packed as other ESD wipes, for maximum continuity to ground in the 10^7 - 10^9 range.

150 wipes per bag

How To Use Poly Double-Onyx ESD Wipes

When folded corner-to-corner, Poly Double-Onyx ESD Wipes form a dissipative grid that allows the wipe to be grounded.

NOTE: the operator must be grounded with a wrist or heel strap and using ESD-safe gloves.
